

Web Developer

A leading software solution company based in central London is looking for a dynamic and ambitious web developer to join their market leading company. This opportunity is ideal for an individual looking to progress their career in a short space of time and to learn new skills which will increase their salary. The right candidate will join a small team that supports and develops a market leading web application which has been developed in house over a number of years.

Working closely with the directors and support team you will be working with many clients in the property development and construction management market who are based in the UK and overseas.

The web developer will be using:

- ASP.NET 2.0 and later
- VB.NET
- SQL Server 2005
- CSS
- AJAX
- JavaScript
- Integration with Microsoft Office

Skills in the following are an advantage:

- VB6
- IIS
- iPhone/iPad App Development

Salary	£30,000 - £40,000 depending on experience
Education Desired	Degree in Software Development or Computer Science
Job Type	Permanent
Job Status	Full Time
Location	Central London

To apply please email your CV and Cover Letter to central@domegroup.co.uk
